VERIZON CENTER – HD SCOREBOARD

| | |
|--|-----------------------------|
| OWNER | Abe and Irene Pollin |
| Location | Downtown Washington D.C. |
| Project Value | \$500,000 |
| Completion date | Oct. 2007 |
| Major Challenge | Compressed schedule |
| General Contractor | ANC Sports Enterprises |
| DESCRIPTION OF WORK | |
| <p>Richards teamed up with ANC Sports Enterprises to install the first indoor high-definition LED scoreboard at the Verizon Center driven by ANC Sports' patent pending VisionSOFT operating system.</p> <p>Over 1,000 feet of linear [light-emitting diode] fascia brings to life the entire upper level of the arena bowl, while 400 feet of full motion signage animates the lower level of the arena bowl. Four additional LED displays also light the top corners of the arena bowl with statistics, 3D graphics and advertisements, completing the entire digital display system.</p> <p>J E Richards scope of work included the installation of approximately 8000 feet of Multi-Mode fiber and 20,000 feet of HD RG-59 throughout the arena and center hung scoreboard. Terminated and tested all connections. Installed 150 feet of 12 inch ladder tray within the center hung scoreboard and installed all control cabling for all scoreboards throughout the arena. All work completed within a 3 week accelerated time frame. Crews worked 12 hr days, 7 days a week to meet schedule.</p> | |
